

Instructions to Patients for the Collection of Urine for Cytology

Your doctor may wish you to provide 3 samples over 3 consecutive mornings

In a specimen container:

1. Collect the complete SECOND urine specimen of the MORNING

FOR FEMALES:

Before collecting urine sample, use a sterile water wipe to clean the urethral opening, wiping from front to back. Discard wipe.

2. *Specimens should be kept refrigerated until taken to your nearest Western Diagnostic Pathology Collection Centre (see back of request form for centre locations)*

Western Diagnostic Pathology, 74 McCoy Street, MYAREE WA 6154
